## Klier Mouthpieces

### “Cologne Models” – silver plated –

Item No.

In the past 120 years, the mouthpieces of the Cologne shape have been adapted by the Josef Klier KG repeatedly to the latest demands. Nevertheless, these models are basically comparable to the mouthpieces manufactured by Ignaz and Josef Klier back in Graslitz. They offer to the players a tonal alternative to the JK Exclusive and USA models.

#### Fürst-Pless-Horn

## Exclusive Series

The exceptionally large selection that the Exclusive Line offers provides every brass player with the possibility to find their personal mouthpiece. Moreover, the rim contours of trumpet, cornet and flugelhorn mouthpieces with the same cup diameter are identical. This allows the player to quickly switch without any difficulty. The unique outer shape of the Exclusive series is the result of numerous tests which had the aim of elaborating the optimum weight of the mouthpiece. It has established itself as a distinctive feature of the JK Exclusive series. The Exclusive Export Line is an enhancement of the Exclusive series. The rim diameter and shape are identical to those of the Exclusive series, allowing problem free switching between the series. The acoustics of the Export Line is designed for symphonic brass and classic brass bands.

## Exclusive Series

The exceptionally large selection that the Exclusive Line offers provides every brass player the possibility to find his personal mouthpiece. Moreover, the rim contours of trumpet, cornet and flugelhorn mouthpieces with the same cup diameter are identical. This allows the player to quickly switch without any difficulty. The unique outer shape of the Exclusive series is the result of numerous tests which had the aim of elaborating the optimum weight of the mouthpiece. It has established itself as a distinctive feature of the JK Exclusive series. The Exclusive Export Line is an enhancement of the Exclusive series. The rim diameter and shape are identical to those of the Exclusive series, allowing hassle-free switching between the series. The acoustics of the Export Line is designed for symphonic brass and classic brass bands.

## Classic Series

„Classic“ trumpet mouthpieces are an extension to the Exclusive Series. According to the today's sound expectations in classical music, these models are offering a deeper volume in combination with a much focused sound. The rim and cup diameters as well as the rim shape are identical to the JK Exclusive models. This enables the player to switch easily between both mouthpiece lines.

With the help of the K- and M- series, the French horn player will be able to achieve different sound ideas with the same cup and rim diameter.

The M series is distinguished by a brilliant sound with clear timbre. It is made possible by a more round and flat cup. In contrast, the somewhat deeper cone-shaped cup of the K- series supports a classic dark timbre.

Furthermore, the rims are more rounded. This way, K- and M- models help to meet the different demands of the French horn player.
